

Institutes currently involved in the ICED programme

The institutes and groups currently involved with ICED are those with which the participants from the launch workshop are affiliated and/or members of the ICED-IPY Consortia. It is anticipated they will become ICED partners following formal adoption of the Steering Committee. As ICED develops the number of institutes and groups involved will increase. For information on becoming involved please contact [Rachel Cavanagh](#) at the ICED programme office.
